

Wishbone Project

Golden Triangle, BC

High-Grade Gold & Silver

Key Highlights

- 3,941 ha property immediately east and contiguous to the Galore Creek deposit
- Drill permit in place
- Prospective for porphyry, VMS and vein mineralization
- Bonanza Gold and Silver grades encountered across multiple targets on the property
- Recently completed IP survey shows potential new vein swarm at Windy target

Notable Targets

Windy - Discovered by Teck in the 1980's

- 2.86 g/t Au over 7.7m (1980's Teck drilling; main vein)
- 8.22 g/t Au, 1,173 g/t Ag over 0.60m chip sample (camp vein)

Wishbone

- High-grade silver at icefall area; 1,093 to 6,708 g/t Ag sampled from float

Rat - New Discovery at Receding Glacier

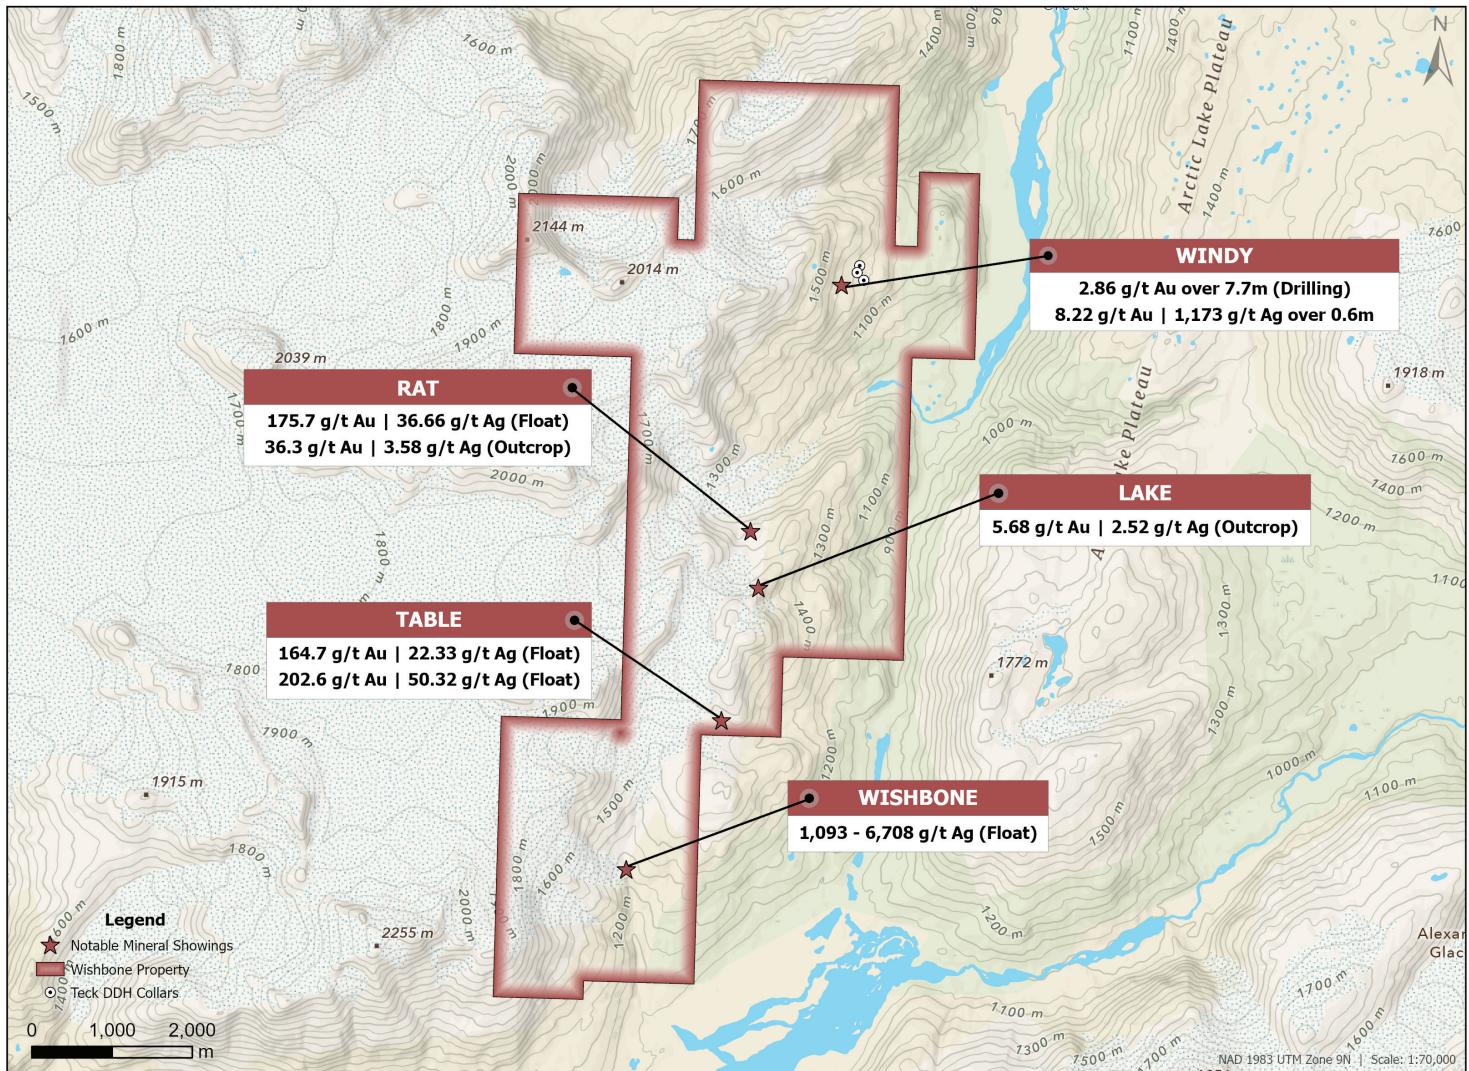

- 175.7 g/t Au, 36.66 g/t Ag (grab from float)
- 36.3 g/t Au, 3.58 g/t Ag (outcrop)

Table - Discovery at Receding Glacier

- 164.7 g/t Au, 22.33 g/t Ag (grab from float)
- 202.6 g/t Au (grab from float)

Lake - New Showing at Receding Glacier

- 5.68 g/t Au, 2.52 g/t Ag (outcrop)

Wishbone Claim Map with Notable Results

Field Work Completed Since Acquisition

- SkyTem property scale airborne (2021)
- Localized IP survey at Windy (2025)
- Extensive soil and rock sampling, geological mapping (2020 - 2024)
